TOPKOTE

Roll-A-Glaze 480X9999

PRODUCT DESCRIPTION

Roll-A-Glaze is a brush/roll additive designed to be mixed in Topkote's 280 Low VOC or UR Glaze to provide maximum leveling and flow when brush or roller application is preferred. The special blend of ingredients allows more open time for workability and anti-foam agents help alleviate bubble formation.

Roll-A-Glaze features, advantages and benefits:

*   Turn your existing coating into a brush/roll system
*   Minimize overspray
*   Maximum leveling and flow

INSTRUCTIONS:
Substrate should be prepared and primed according to topcoat instructions prior to topcoat application. Mix ratio is 4 parts glaze, 1 part activator and 2 parts brush/roll additive. Do not add reducer. Apply 1 wet coat at approximately 2-3 mils.

EQUIPMENT:
It is important to apply the glaze with high quality applicators. For best results use a high quality 3" All Paints brush. You can also use a 6" foam roller.

SAFETY

Respirator

Use a properly fitted, air-purifying respirator complying with an approved standard.

Ventilation

Use only with adequate ventilation.

PHYSICAL PROPERTIES

Composition	Paint Additive
Weight	7.51 lb/gl
VOC	6.88 lb/gl
Shelf Life	N/A
Flash Point	109°F (40°C)
